

Dear *Active Chemistry* teacher,

We hope that you are looking forward to teaching *Active Chemistry*. We'd like to invite you to participate in a high quality, 'just-in-time' professional development that will support your teaching and provide additional resources for you.

The National Science Foundation (NSF) is funding an exciting opportunity to learn *Active Chemistry* curriculum and reflect on your own teaching. By becoming a participant, you will not only be working towards boosting your students' achievement but you will also find yourself saving preparation time and receiving as little or as much support you need in order to learn the content and implement the curriculum in your classroom. We will provide a variety of resources online for teachers. The professional development will be completed while you are using **Chapter 1: Fun with the Periodic Table**. Importantly, the professional development is located online so you will be able to access the resources, post questions and collaborate with other *Active Chemistry* teachers at your own convenience.

There is no cost to you for participation. As a way of saying thank you for your involvement and efforts, we offer a variety of small 'prizes' throughout the professional development.

We are really excited about this and it is our hope that you and/or your district will be able to join us. If you are interested in participating, we ask that you now complete a registration form which can be located at: <https://www.surveymonkey.com/s/ACTC-registration> (*Please note that if after clicking on the link above you are not directed to the registration website, please cut and past the entire address into your browser*).

If you have any questions at this time, please send an email to activechemtc@gmail.com.

We look forward to hearing from you.

Best Wishes,

Arthur Eisenkraft
Director, COSMIC
University of Massachusetts Boston

Kim Rocco
Active Chemistry Project Coordinator
