

Investigation 4:

Water Movement on the Planet

Key Question

Before you begin, first think about this key question.

How is water recycled in nature?

You have seen where your local water supply comes from. How else does water move through your community? Discuss your ideas with your classmates.

Materials Needed

For this investigation the materials your group will need are listed with each part of the investigation.

Investigate

Part A: Visualizing Water in the Environment

1. Draw a picture of a cloud with rain falling from it, mountains, a stream coming from a mountain, and a body of water. Use the diagram on the following page as an example.
