

INVESTIGATING WATER AS A RESOURCE

2. Think about places in the picture that water would be in one of its three forms: solid (ice), liquid, or gas (vapor).
 - a) Label these places on your diagram.
3. Share your labeled drawings with your group members and then with your class.

Discuss any differences in the ways you have labeled your drawings.

 - a) What evidence do you and your classmates have for your ideas?
 - b) What changes might you make to your diagram, based on your discussion?
4. Imagine you are a drop of water.
 - a) Describe how you would move throughout the environment pictured in your sketch.
 - b) What forces cause you to move?
